Skills and project experience with personal goals

My own assessment of my skill level in the range 0-9. Personal goals to use a skill more (+) or less (-). How many years I worked with a skill and the last time I used the skill.

Project management and software innovation skills

Skill	Level 0-9	+/-	Years	Used
Teaching new IT professionals	7	+	4	2024
Technical project management (TPM)	8		23	2024
Solution and product architecture	8		24	2024
Requirement specification	8		22	2024
Programming	9		29	2024
Agile processes (SCRUM, SAFe, KanBan)	8		14	2024
Originative learning and innovation processes	8		18	2024
Micro Service Architecture (REST, OpenAPI)	7		7	2023
Web usability and workflows	8		13	2023

Development skills

Skill	Level 0-9	+/-	Years	Used
JavaScript and web development	9	+	23	2024
React and progressive web apps (PWA)	8	+	7	2024
NodeJS	8	+	8	2024
C#	8		15	2020
PHP	7		10	2022
Python (NLP)	6		2	2020
Java	7		14	2015
React Native	5			2019

Projects and domain experience

Skill	Level 0-9	+/-	Years	Used
The New Music School (teaching developers)	8		3	2023
OLIO Product Innovation (Progresive web apps)	8		3	2023
DanskeSpil (Tech PM and Solution architect)	9		2	2018
Oligo Academy (OpenSimulator 3D education)	7		6	2020
FindWise (Enterprise search specialist)	7		1	2015
Empisto/OLIO (Education sector products)	9		10	2023
Danish Parliament, Foreign Ministry and more (Tech PM and Sitecore CMS Solution architect)	8		5	2014
Danish Energy Agency (Solution Architect)	8		2	2012
Tieto Enator, Software Innovation, Scanjour (Record and Document management specialist)	8		7	2006

Hosting, database and DevOps skills

Skill	Level 0-9	+/-	Years	Used
Linux/UNIX	7	+	13	2024
Docker	7	+	4	2022
Solr enterprise search solution	7		4	2021
MySQL and MariaDB	8		19	2024
MicroSoft SQL server	7		12	2015
Oracle and PL/SQL	8		10	2018
Cassandra NoSQL	6		2	2020
DevOps (Plesk)	7		4	2024
Test Driven Development (TDD)	6		1	2022
Raspberry Pi mini servers (IoT)	7		2	2021

Languages

Language	Level 0-9	+/-	Years	Used
Danish	9		48	2022
English	8		36	2022
German	7	+	19	1992
French	4	+	2	1992
Greenlandic language	0	+	1	2022

Courses and certifications

Skill	Level 0-9	+/-	Days	Used
DataCamp: Python, NLP, data science, TensorFlow	7	+	4	2019
Udemy: Umbraco developer	5		3	2022
Udemy: React Native	5		5	2019
Sitecore 7: Certified .NET developer	8		3	2014
Documentum, Java and Oracle and PL/SQL	8		30	2001

Availability and salary

Available from	May 2024
Available	25 hours / week
Remote senior developer	95 € / hour (710 DKK)
Remote Technical project manager or Solution architect	110€ / hour (820 DKK)
On-site meetings near Copenhagen for Solution Architect or Technical project manager roles	125€ / hour (930 DKK)
Full time monthly salary expectations	68.000 DKK

Profile and personal goals

The last years I been teaching young developers professional development skills, agile development best practices, progressive web app technology and DevOps.

I worked with research and development (R&D) and software product innovation processes, where I can use my background as product manager, solution architect and senior developer to build disruptive new products and ideas together with my customers.

I am an experienced manager of outsourced teams in many different countries, working with team efficiency based on a pragmatic Scrum approach. I have experience with very large scaled agile projects with hundreds of people involved. I worked many years with the public sector and their legal requirements and I am used to working with confidential information and have been security cleared many times.

I have been programming 38 years in more than 20 different programming, script and database languages. My recent programming skills include NodeJS, JavaScript, Python, C# and React for progressive web apps (PWA). I have worked mostly with microservice architectures and REST API's described in OpenAPI (Swagger).

I was born in 1973 and started programming low level Assembler code in 1984 and studied Computer Science at Copenhagen University from 1992-1996. I started my first professional developer job in 1995 at Copenhagen Business School as system administrator and database developer. I have worked as freelance solution architect and technical project manager since 2006. Today I teach new developers agile development practices. I love to draw, listen to music and practice the martial art Tai Chi. I travel to learn new languages and like talking to people, over a good cop of coffee.
